SUMMARY

Frontend engineer with 4+ years of experience building and shipping data-heavy web applications at Annalect (Omnicom Group). Built an internal media investment planning platform from the ground up, now used by 200+ daily users to plan over \$5B in media spend. Experienced in JavaScript and TypeScript across Web Components (Lit) and React, with strengths in data visualization (D3.js, Highcharts), translating design into accessible production UI, and LLM-assisted development workflows.

SKILLS

JavaScript, TypeScript, React, Lit, Web Components, HTML, CSS/SCSS, D3.js, Highcharts.js, AG Grid, REST APIs, Python, SQL, Postman, Docker, Git, CI/CD, Feature Flags, Storybook, Figma, Zeplin, Jira, Confluence, Agile/Scrum, LLM-assisted development (Claude Code, GitHub Copilot)

EXPERIENCE

Frontend Engineer - Annalect (Omnicom Group)

May 2022 - June 2026

Planning Agent - Channel Flow Team (Dec 2025 - June 2026)

- Developed interactive data visualization charts in React and TypeScript with Highcharts.js to surface channel strategy insights in the Channel Flow planning platform
- Built and shipped a new strategy flow step in React behind feature flags for safe incremental rollout, with UI consistent with the team's Storybook component library
- Used LLM-powered coding tools (Claude Code, GitHub Copilot) daily for code generation, bug detection, and code review preparation while owning design decisions and final code quality

Investment Channel Planning Team (May 2022 - Dec 2025)

- Built an internal media investment planning tool from the ground up with JavaScript, Lit, and Web Components now used by 200+ daily active users to plan ~2,000 campaigns per month and over \$5B in media spend
- Implemented high-performance data tables with AG Grid, handling 5M+ data curves across 1,500 clients and 3,000+ brands in 110 countries
- Built and owned an interactive channel wheel visualization in D3.js, and maintained its underlying database of 75+ media channels
- Developed a library of reusable Lit Web Components shared across the application, reducing duplicate code and making new features faster to build
- Turned Figma and Zeplin designs, Jira tickets, and acceptance criteria into accessible, production-ready features, shipped through CI/CD pipelines with automated checks
- Worked directly with backend engineers to validate Python REST APIs against frontend requirements using Postman and Docker; used Python and SQL to trace data issues and resolve them during debugging and releases
- Reviewed teammates' pull requests and handled urgent production hotfixes outside the standard nightly deployment cycle

Web Designer Intern - NYC Tech Pros, New York, NY

Jun 2020 - Aug 2020

- Built responsive web interfaces with HTML, CSS, and JavaScript, working directly with the CEO to turn design direction into functional pages
- Iterated quickly on layout, visual hierarchy, and cross-browser behavior based on direct stakeholder feedback at an early-stage startup

EDUCATION

Certificate in Software Engineering - Flatiron School	2022
Associate in Computer Programming - ASA College	2020
B.A. in Japanese Studies - Naresuan University	2015
